

APEX FIBERNET SOLUTIONS

Comprehensive Master Service Agreement & Tariff Guide (v2.4)

This document serves as the exhaustive reference guide for all residential, commercial, and enterprise broadband services provided by Apex FiberNet Solutions. It details tariff structures, billing operations, hardware policies, and fair usage guidelines. This document is highly confidential and intended for internal training and RAG knowledge base ingestion.

1. Broadband Tariff Structures

The following tables outline the comprehensive plans available across our network infrastructure. All tariffs mentioned are on a per-month basis and exclude an 18% Goods and Services Tax (GST).

1.1 Residential Fiber Plans

PLAN CODE	MARKETING NAME	MAX BANDWIDTH	FUP QUOTA	POST-FUP SPEED	MONTHLY RATE (INR)
RES-100	Home Basic	100 Mbps	3,300 GB	5 Mbps	499
RES-200	Home Plus	200 Mbps	3,300 GB	10 Mbps	799
RES-300	Home Premium	300 Mbps	4,000 GB	15 Mbps	999
RES-500	Home Ultra	500 Mbps	4,000 GB	25 Mbps	1,499

1.2 Commercial & SME Plans

PLAN CODE	MARKETING NAME	MAX BANDWIDTH	FUP QUOTA	POST-FUP SPEED	MONTHLY RATE (INR)
COM-500	Biz Essential	500 Mbps	6,000 GB	30 Mbps	2,499
COM-1000	Biz Gigabit	1 Gbps	10,000 GB	50 Mbps	4,999
COM-STATIC	Biz Gigabit + IP	1 Gbps	10,000 GB	50 Mbps	5,499

1.3 Value Added Services (VAS)

- **Static IPv4 Address:** INR 250 per month (Available on all plans; default on COM-STATIC).
- **OTT Entertainment Bundle:** INR 199 per month (Includes basic access to 5 regional streaming platforms).
- **Advanced Network Security:** INR 149 per month (Provides deep packet inspection and malicious domain blocking at the ISP level).

2. Billing, E-Receipts, and Data Administration

Efficient and secure processing of subscriber financials is central to our operational integrity. Our billing infrastructure has completely transitioned from physical paperwork to an automated digital ecosystem.

Automated E-Receipt Workflow: All physical receipt books have been discontinued. When a subscriber makes a payment, the data is pushed to our central payment gateway. E-receipts are automatically generated by triggering a digital system that fetches user details directly from a secured Master Google Sheet.

2.1 Employee Access Protocols

To maintain strict data confidentiality, administrative access control is strictly enforced. Field agents, sales representatives, and Tier-1 support staff are fundamentally restricted from viewing or editing the central master sheet. Staff must use localized lookup tools that only expose necessary verification fields. Any systemic mismatches requiring database overrides must be handled exclusively by the Administrative Data Systems Manager.

2.2 Payment Cycles and Penalties

- **Billing Cycle:** 1st to the last day of the month.
- **Invoice Generation:** Invoices are dispatched via email and SMS on the 1st of every month.
- **Due Date & Grace Period:** Payments are due on the 5th. A standard grace period is extended until the 8th.
- **Late Fees:** A flat penalty of INR 150 is levied if payment is not realized by 23:59 on the 8th.
- **Suspension:** Services are automatically routed to a walled-garden suspension page if dues remain uncleared by the 10th of the month. Reactivation requires clearing the full pending amount plus a INR 50 reactivation fee.

3. Fair Usage Policy (FUP) & Traffic Management

The FUP is implemented to prevent network abuse and ensure consistent latency and speeds for all subscribers on shared GPON infrastructure.

- Bandwidth allocations (e.g., 300 Mbps) are provided on a "best-effort" basis over wired Ethernet connections. Wi-Fi speeds are subject to environmental variables and router capabilities.
- Upon exhausting the allotted High-Speed Data Quota (FUP), the connection will not disconnect but will seamlessly downgrade to the specified Post-FUP speed for the remainder of the cycle.
- Data quotas reset strictly at 00:00 hours on the 1st of the succeeding month. Unused data from previous months is forfeited.

4. Hardware, Installation, and Cancellation Policy

4.1 Customer Premise Equipment (CPE)

All Optical Network Terminals (ONT) and Dual-Band Wi-Fi routers are provided on a dual-mode basis:

1. **Rental Basis:** Equipment remains the property of Apex FiberNet. A fully refundable security deposit of INR 1,500 is required at the time of onboarding.
2. **Outright Purchase:** Customers may purchase the router for a one-time fee of INR 3,500, conferring immediate ownership and a 1-year hardware warranty.

Cancellation and Hardware Return: Subscribers must provide a minimum 15-day notice prior to the end of their billing cycle to terminate services. If the CPE was provided on a rental basis, it must be returned to the local nodal office in working condition, complete with power adapters. Failure to return the hardware within 7 days of disconnection will result in the forfeiture of the INR 1,500 security deposit.

4.2 Plan Downgrades and Upgrades

Plan upgrades are processed dynamically and take effect within 4 hours of the request. The billing difference is calculated on a pro-rata basis and added to the subsequent invoice. Conversely, plan downgrades are queued to take effect only at the commencement of the next billing cycle. We do not issue mid-cycle refunds or prorated credits for plan downgrades.

5. Escalation Matrix

In the event of network outages or unresolved billing disputes, subscribers are advised to follow the structured escalation matrix:

- **Level 1 (Support Desk):** Available 24/7 via the customer portal or toll-free number (Response time: 4 hours).
- **Level 2 (Nodal Officer):** If unresolved within 48 hours, escalate to nodal@apexfibernet.com (Response time: 24 hours).
- **Level 3 (Appellate Authority):** For disputes extending beyond 7 days, written appeals can be submitted to appellate@apexfibernet.com.
